

PHOTOBOX USER GUIDE

Throughout the project I found myself in difficult achieving the 3 use cases I designed initially so adjustments were made.

With regards the uploaded live applet, the delete button does not work accordingly and returns this error: `java.lang.IllegalArgumentException: The kind "__BlobInfo__" is reserved.`

<http://www.coderexception.com/Cu1HBH6HPUWQyQyi/cant-delete-blob-data-gaejavadatastore>

I have found multiple occurrences of this error online, none of which offered a viable solution. It seems to be an error with the blobstore api and googles appspot permissions.

This error does not however occur offline, as the applet functions accordingly. I therefore have based this user guide on the local version of the applet.

Guest

The user will be a guest by default as long as they are not logged in. They can view the icon picture, and if they wish to log in they may do so from this screen.

Admin

The admin can log in and view pictures that they have uploaded. They can select pictures from the list and delete them if necessary. They can also upload more pictures under their admin account.

The admin email addresses that are accepted are kieranhogan13@gmail.com, and mark.deegan@dit.ie.

Pictures can be clicked to open the full picture in a link.

1. Click sign in here
2. Enter the admin email address
3. Click the choose files button
4. Select a picture
5. Click the upload private picture button
6. Click the picture
7. Click back in the browser
8. Select the checkbox beside the picture
9. Click the delete button
10. These are the basic functions of the picture box

User

The user can log in and view his or her privately uploaded pictures. They can select pictures from the list and delete them if necessary. They can also upload more pictures under their private account.

Pictures can be clicked to open the full picture in a link.

1. Click sign in here
2. Enter the user email address
3. Click the choose files button
4. Select a picture
5. Click the upload private picture button
6. Click the picture
7. Click back in the browser
8. Select the checkbox beside the picture
9. Click the delete button
10. These are the basic functions of the picture box
